

EU Certificate of Conformity

H+B Homberg + Brusius e.K.

Auf der Lay 31, 55743 Kirschweiler, Germany

mail@homberg-und-brusius.de

Tel. +49 6781 35036

Material: LDPE 160x250x0,1mm transparent
Article-/Reference No.: V99001
Packaging type: Soft polyethylene flat bags
Use: Packaging 1kg grinding-/ polishing powder

This declaration of conformity is issued under the sole responsibility of the manufacturer. We hereby confirm that the plastic bags comply with the heavy metal threshold limits in accordance with Art. 5 Para. 4 of Regulation (EU) 2025/40 (PPWR). This provision continues the restriction previously applicable under Art. 11 of Directive 94/62/EC without any changes in substance: the sum of concentration levels of lead, cadmium, mercury, and hexavalent chromium resulting from substances present in the supplied packaging or packaging components does not exceed the threshold limit of 100 mg/kg. Furthermore, based on the information and supplier declarations available to us, we confirm that the presence and concentration of substances of concern within the meaning of Art. 5 Para. 1 of Regulation (EU) 2025/40 (PPWR) in these plastic bags are minimized to the lowest extent possible. This also includes, where relevant, their presence in emissions and in materials managed during waste management operations. The assessment of conformity is based on the information and supplier declarations available to us, as well as on the restriction and control of substances in packaging materials as required by Article 5 § 1 and 4 PPWR.

Recyclability & Applied Standards: The specified plastic flat bags are designed to be recyclable in accordance with the provisions of Regulation (EU) 2025/40 (Design for Recycling). Compliance is demonstrated through adherence to the European standard DIN EN 13430 for the material recycling of plastics based on recognized assessment guidelines (e.g., RecyClass guidelines) as well as the available material declarations and data sheets provided by our suppliers.

Recycled Content: We confirm that the recording and documentation of the recycled content (Post-Consumer Recycling - PCR) is carried out on the basis of manufacturer and supplier verifications within the technical documentation in order to meet the future requirements of Regulation (EU) 2025/40.

Furthermore, we confirm compliance with the REACH Regulation (EC) No 1907/2006, as amended, for the supplied materials.

Kirschweiler,

Kitty Homberg, Owner
